Autosurfs Not exactly automatic

Autosurfs are supposed to be a way to generate credits automatically, in order to get traffic to your website. Even the best Autosurfs traffic exchanges can't seem to filter out all the frame breakers and sites that have scripts that will stop you from generating credits automatically with your browser. This makes it so that you have to constantly monitor your browser window to make sure that the autosurf is still running, and has not stop due to a script.

Well there is a way to make autosurfs traffic exchanges truly automated generating huge amounts of credits plus referrals to your referral links with the exchanges giving you even more credits from there activity.

Large numbers while you sleep

What I will be showing you in this e-book is a method of generating huge amounts of credits across many AutoSurf exchanges. This method will allow you to generate huge numbers with very little effort. Once you get everything in place you will generate credits even while your computer is turned off. Most of the work is in setting it up. But once in place, it is pretty much on autopilot. And just keeps building credits even while you sleep.

Finding the right AutoSurfs

In this e-book I will refer to the method I am about to reveal to you as a traffic machine because in a way it is a virtual credit generating machine. So lets get started, there are certain AutoSurfs, which are needed in order to make this method work. Not just any AutoSurf exchange will do. Now it's not very nice to say, but the fact of the matter is that 95% of traffic exchanges are dishonest to a varying degree. Some are Just down right ridiculous. So the biggest part of setting up your traffic Machine, is finding AutoSurfs that are honest, at least 75% of the time. This can take a fair amount of time and research.

But to help you get your first traffic machine up and running, I have listed in this e-book, a table with ten AutoSurf traffic exchanges. At the time of writing this these exchanges met the necessary requirements needed to build a very good viral traffic machine. The other attribute that the exchanges are required to have in order to make your machine work, they must reward you at least 1.5 credits for every hit you send to your referral link.

The referral link is the link they assign to you in order to promote there site; most exchanges will give you a percentage of any credits as well as being rewarded by the direct action of your referrals. Some exchanges also reward you with credits for every hit sent to your referral link. These are the AutoSurfs that we're looking for because of the fact that you get rewarded for the traffic sent to your referral link as well as the actual referrals you make. If the exchange doesn't offer more then one credit for every hit sent to your referral link, that exchange is of no use, and a poor candidate in most cases for the traffic machine.

There can be some exemptions to this rule as long as 90 percent of the exchanges offer at least one credit or more for every hit to your referral link.

The exchanges listed in the table below reward you with anywhere from 1 to 10 credits for each hit sent to your respective referral link. These two criteria eliminate a lot of AutoSurf exchanges, but there are many out there and more every day.

BUILDING STEPS

Step 1

Now you need to register with the ten AutoSurf exchanges listed in the table on the next page, or with some other AutoSurf exchanges that meet the criteria mentioned above.

Step 2

Next in each of the AutoSurf exchanges that you register with, you have to add the referral links of all the other AutoSurfs, into the area of the exchange where you list the sites you want to send traffic to. Most Exchanges will let you add up to 5 or 10 sites, to which you can send traffic to. So now you have setup in each of the AutoSurf exchanges the nine referral links of the other exchanges or as many as they will allow.

Be careful not to enter your referral link into the same exchange you got it from; it makes no sense to promote traffic exchange A to traffic exchange A as anyone that sees it would already be a member of that exchange. You would be promoting the exchange to itself, for instance entering traffichippie.com referral link into its list of sites that you want traffichippie.com to send traffic to. The only sites that you enter into traffichippie.com to send traffic should be the nine referral links from the other exchanges.

Step 3

Next you need to assign the bonus credits that each of the exchanges gave you for signing up with them, and evenly distribute them to all the referral links in each exchange. So now what you have, is ten AutoSurfs each sending credits to the nine other traffic exchange referral links. The ones that don't give you any sign up bonus credits don't worry about. You just need a few exchanges that do give signup bonus credits.

Step 4

In most of the exchanges, you're going to find that you will have an extra place to add another URL. This is where you add the URL of your website you want to promote.

SOME OF THE BEST AUTOSURFS

These exchanges in the table below seem to be working well as of this writing. As you likely already know, things in the world of traffic exchanges change on a daily basis, exchanges come and go like the seasons.

So if you come across one of these exchanges, and there gone or they have made changes to their rules or regulations, making them no good for a traffic machine. Then you must go and find other AutoSurf exchanges that will meet the criteria we spoke of earlier. The traffic machine works best with ten exchanges but will still function with less.

Join these AutoSurfs programs and set URL's and assign bonus credits			
Name of Exchange	Sign up bonus	Referral link Credits	Traffic delivery
ablazewithtraffic.com	1000	4	Good
definitexchange.com	1000	3	Good
24-7autohits.com	1000	3	Good
AmericanAutoSurf.com	1000	3	Good
traffictemple.com	2,000	5	Poor
UltimateVisitors.com	97	1.5	Good
AutoHits.dk	0	0.1	Excellent
ClickEvolution.com	0	1	Good
chapz.com	20,000	2	Fair
italysurf.com		3	Good

THINGS START TO SNOWBALL

Once the exchanges start sending traffic to all your referral links on the other exchanges, things are going to start to rock. Each time credits are getting transferred back and forth to all the exchanges they are multiplying credits. Sometimes as much as five to one on some of the exchanges.

As you can see this can have a snowball effect, as time goes on you start to pick up a lot of referrals from each of the exchanges. You will start to add bonuses and percentages from their surfing activity. After a few weeks of this activity, your exchanges start to bloat with free credits. You start to build credits up faster then you can use them.

When you estimate that you're going to be six months or more getting your hits delivered, you can start removing the referral links for that site off the other exchanges and replace it with the site you want to promote. Just don't remove them off all the exchanges as your account will appear inactive and some exchange owners have the script on there site set to remove dormant accounts.

Some exchanges will start to really slow down on delivering traffic. In order to speed them up you might have to surf a very small amount each week to keep the hits coming pretty good. Most exchanges don't require you to do this, but there is the odd one that requires you to do a small amount of surfing.

One good way to surf these exchanges is with tabbed browsing, opening multiple tabs with 5 or so exchanges running at once. So once or twice a week I will give them a little boost for an hour or so.

BUILDING OTHER GROUPS

You might also find other exchanges that offer a lot of credits for hits to your referral links besides these ones. If you can get another group of them to put together like the first group. You could really start generating a lot of credits

between the two groups. By taking the tenth slot of each exchange and feeding some of that traffic into the other group or groups, having the two groups or more groups feeding traffic to one another.

Adding groups together like this can generate insane amounts of traffic. The big job is finding all the exchanges that have the requirements needed as stated previously. With the huge amount of AutoSurfs available and so many springing up every day, there's enough AutoSurfs out there. I am sure a person could get enough to link several of these traffic machines together.

The only down side to all this traffic from the exchanges is the fact that it is of such poor quality that it makes it almost useless for generating sales or leads, unless you know how to properly use this type of traffic. I can honestly say you're wasting your time with this kind of traffic generation unless you can implement it properly. The traffic from traffic exchanges is so poor that if you were trying to sell a product directly from this traffic your conversion rate would be so low that you would need a million credits to even generate a lead, let alone a sale.

99 percent of people that are using traffic exchanges are very new to internet marketing. The only ones benefiting from the traffic exchanges are the owners of the exchange site. The good news is there are ways to turn this garbage into something good, so that you can make money and get subscribers to your mailing list. Or whatever else you are wanting traffic for.

TURNING LEAD INTO GOLD

Here are a few methods. That you can use to turn this completely untargeted traffic into a more targeted form. A lot of the AutoSurfs let you host banners on there exchange; they usually give five to ten impression for one credit. The clicks on your banner are going to be much more targeted. The other thing you can do is to make your product more targeted to the traffic from the exchanges. By making a Squeeze Page and offering a product that helps people get more

Traffic because the people that are using traffic exchanges are Looking for traffic.

You can also join a good traffic exit exchange and put the code they give you into a squeeze page. You also place five banners on the same page from banner exchanges. You now make another squeeze page the same as the first the only differences in the two is one has the exit exchange code in it and the second one doesn't. When you get the exit exchange code make sure that it is popunder code and not popover.

The traffic you send to the page with the exit exchange code has to come from the AutoSurfs that allow you a popup on your pages. Some AutoSurfs will allow you to send your traffic to a page with a popup on it. Any that do, send them to your squeeze page with the popup code.

THE POWER OF LIST BUILDING

Now you are getting higher value traffic from the exit and banner exchanges. This gives you a more targeted form of traffic, but it is still very poor quality and would take a huge amount of it to make any money with it. And this is why If you are trying to promote anything with this traffic, it should be to build a mailing list with a splash page offering some free information on how your prospects can get free or cheap traffic.

You may have heard that building a mailing list is very important to your marketing success, and if you did, that was some good advice being shared with you. If you are going to succeed with any internet marketing ventures you have to build a list.

Building a list is the best way of turning your poor traffic into a super form of targeted traffic.

Because with a list you have a group of people that are interested in what you are promoting and are there for repeated offers over and over again, It sort of like visitors on hold that are there when ever you send an e-mail to them. In my opinion one person on your list is worth a thousand AutoSurf credits with each mailing.

Have you ever wondered how some of these super affiliates make there fortunes on line, It is because they have access to a list of people that are interested in there products. And I guarantee you if you're not building your list right now, you have been wasting your time and will not likely succeed in anything you're promoting.

I realize this is taking a pretty hard line, but I wrote this e-book to help you to get out of the same rut I was trapped in for a long time. One thing you will find online is a lot of misdirection and lies. If there is one truth, it is you need to be building your list.

So I thought of a great way to help you to start building your mailing list. And it is with this e-book you are reading right now. I will give you the rights to give this e-book away on your squeeze pages as a gift to get people to join your mailing list. You will get a lot of signups, because if you remember this e-book is all about

getting thousands of credits on AutoSurf traffic exchanges. This product is targeted to the people that will be viewing your squeeze pages.

YOUR CHANCE FOR REAL GOLD

You also have the option to buy the branding tool for this e-book. This will allow you to replace all the affiliate links for the traffic exchanges in the table above, with your referral links. So now you will get all the referrals to those AutoSurfs as well as the bonus credits. You will also be able to replace the link with the PayPal script at the bottom of this e-book with your Paypal email button script.

What this means is every time someone gets this e-book from you and decides to pay the \$22 for the branding rights; you will make the \$22 commissions. You might be asking will this work, I can tell you yes! It does indeed. I have been making money from doing this tried and true system for a long time.

I will also include a squeeze page that works like crazy; on AutoSurf traffic exchanges as well you will get the branding tool that will allow you to re-brand this publication with your referral information.

If you don't want to purchase the branding tool and you just want to give a copy of this e-book away, then your welcome to do that also. The only stipulation is that you don't make any changes to this publication except those that are made by the branding tool.

By following the steps in this publication you will get targeted traffic to your squeeze page. You can't help but make money from this.

If you would like to purchase the branding tool for this e-book and be able to replace the referral links with your own referral links, then please visit this link [Click here to Purchase](#).

Now that we got the sales pitch over with. What I have been trying to show you in this publication is that you can make money with the traffic from traffic exchanges. But it is very important to understand that even if you soaked up all your monthly bandwidth on your web hosting provider. You can't generate sales unless you target traffic to your product or target your product to your traffic.

Understanding that making sales on the internet is very hard to do and if not done properly you're wasting your time and you will eventually get very discouraged. The way sales are made online by the pros is very slow and organized. Like a good fisherman. By using the right bait in the right fishing area of the lake and having the net to bring in the catch. With internet marketing the lake is the internet, and in that lake there are fish "your prospects" that are attracted to a particular type of bait. Some are attract to flies while other fish are attracted to smaller fish or maybe bugs. But each fish has there type of bait there interested in. With the internet you have to supply the right type of bait to the folks that see your offer.

In other words people that use traffic exchanges are looking for traffic to there websites, not a new car or a cure for acne. When you have the right kind of bait for the part of the internet you're fishing in, you need a reel to bring the fish closer to your net. This is were your splash page comes in, as this is were you start the funnel process of introducing your prospects into your list or net. The fishing analogy is the closest thing I can think of to help give you a clearer idea of how this process works. And if you don't do it this way you won't catch many fish or get many sales.

If you haven't already you can join our mailing list and receive some of the best free content on the internet as well as information on how to get the right kind of traffic to your website, the right tools and resources you will need and were to get them.
